Bio-Enzyme Entrepreneurs Academy of India, is spearheading the promotion, training, production, distribution, research and application of Bio-Enzymes and its products in day to day life and living. We are determined to help the individuals, families and the communities to move towards a more natural, eco friendly, and sustainable life at home, neighborhood and society. A group of scientists are guiding and supporting us with their extensive study, learning, and R&D.

The Bio-Enzyme Entrepreneurs Academy of India, an apex body of Bio-Enzyme producers in India, is taking a giant step in training and mentoring tens of thousands of interested individuals and groups to become Bio-Enzyme entrepreneurs. This will help them to lead toxin free natural life, and also earn a livelihood in the social business of Bio-Enzymes.

OUR JOURNEY SO FAR.....

We are a year young now, since this is our first newsletter, we would like to share one year's journey through this document with all. It is definitely fortunate to see the kind of personalities joining this mission. We wish to develop the network of all the producers, scholars, institutions across the globe. Our heartfelt gratitude to many people who have supported us so far including Dr. Rosukon & Dr. Joean and her team who have been guiding us from time to time.

Registration of Trust: It was 26th March 2021 finally when we registered Bioenzyme Entrepreneurs Academy of India in Bangalore. It took almost 2 years to come up with the final draft of this Trust to be registered. The best part was when registrar asked if some lawyer had drafted the trust document. Every little detail was mentioned by him with so much clarity, what we wish to do in this organisation. Though we wished for representatives from across the country to be on board, it was difficult for everyone to come together, as our country was resting during Covid.

The first virtual meeting of knowing each other happened on 5th May 2021. This meeting was more than just knowing each other, and we all were sure, this organisation would create magic.

Formal virtual launch of this organisation happened over two weekends in August 2011. 8th August is the day when Quit India Movement started in 1942, we launched with a positive note of "Adopt Natural Life" and 15th August as independence-day, we observed it as "Conscious Consumerism and Sustainable Lifestyle Choices". We were successful in making these two days interesting and eventful with the launching of our website (www.beacademy.in). With individuals, organisations/institutions joining us, this event brought a different perspective to BioEnzyme and we named it - Nature Stories, Soul Talk

Let the Rivers talk - Godavari Sansad, Nanded moderated by Mr. Atul Gopal

NatureEssense - Nisha Bhimaiah Soulfully connected each participant using her expertise.

Grow Soil - Vani Murthy enlightened us with her composting journey

Living Colours - We were all colored by Harshita, Nanditha and Manya

Connection happened by Jugnu.... Amazing integrating show

Soul Space - Beautifully covered by Geeli Mitti - Sustainable homes

Beautiful world of BioEnzyme- interaction with Dr. Joean and Dr. Rosukon's blessing inspired about 600 people.

OUR JOURNEY SO FAR.....

Joining Hands: One of our initiatives involves bringing all the Bioenzyme Makers under one roof and to initiate this we floated membership details in September 2021 and we have around 100 members within a few months of floating this activity. Many are individuals, who wish to start an entrepreneurial journey with us, few existing brands came forward to guide emerging ones. Our motive is to collaborate and not compete.... And we see this shaping up, beautifully.

Board: We have created an Advisory board to shape up our Academy. Dr. Joean and Dr. Arun is not a new name to us, they were obliged to join our mission along with Dr. Mansee Bal and Dr. Snehal Donde.

Curriculum Development: in order to get BEA to reach institutions to integrate our program in their curriculum, a team is in place to work on the same and will be shaped soon.

Launch of State Chapters: November 2021, under the guidance of the local team and a tie-up with SPARSH, we initiated our Odisha chapter with a virtual workshop. It is slowly but surely spreading the wings to Government Departments, Institutions and NGOs.

World Bioenzyme Day: In order to honour and express our gratitude to Dr. Rosukon for her contribution in garbage enzymes, which is one of the solutions to the existing planet's problem. With regard to this, a consultative meeting took place in December 2021 with Dr. Joean and rest of the well-wishers and it was decided to declare 4th January, which happens to be Dr. Rosukon's Birthday, as World Bioenzyme Day.

We connected worldwide and the celebration went on for a week. The idea was to spread the

message. Some of the initiatives taken up were sharing on BE, Pouring BE in water bodies, exploring BE and the event concluded with the virtual participation of more than 350 participants across the world. This was the first time when Dr. Rosukon came on a virtual platform and shared her experiences with all of us.

Our Reach:

- In January 2022, Swacch Surat initiative was started with the virtual meeting
- A hybrid meeting was organised at Govt. Holkar Science College with almost 10000 students participating. We discussed BioEnzyme and it was an interactive session with students. Abstract of the talk is being compiled and will be released soon.
- Virtual program for a group of environmentalists to save Mahoning River in Youngstown, USA
- September 2021 Shajapur for group of ITI students
- To commemorate World Water Day- Lakes water restoration took place in Raipur, Bangalore, Ujjain, Bhilwara, Bhiwadi, Agra
- Virtual meeting was conducted for the Innerwheel club of Rotary Odisha wing
- Marathon of events between 26th to 28th of November 2021 comprising of training sessions at Vriddhi, Women organic farmers SHGs, Rotracts, Rotary e-club, two waterbody restoration program at two villages, interactive meetings with Principal and administrative staff of Future Bhubaneswar School, MD, Center for Policy Governance & Advocacy and VC, OUAT, Odisha.
- January 2022 a meeting with Youth for Water, UNICEF and TATA STRIVE of TATA Foundation
- Virtual Workshop and training session organised for different stakeholder, institutions
- 5th and 10th March 2022 site visit and assessment by Sharada Bharaty with local community members to MCC (Micro Composting Center) Bhubaneswar Municipality Corporation.

IDEA TO INCEPTION

Priti - We stand on three strong pillars of Education, Network and Restoration of Water Bodies and its taking up shape across India. The vision of working together with all the BE literate in different arrays of work is coming together. We have a passionate group of People on Board, with the mission of coming together to commence some huge change in society and ecology.

Mahesh Navhal - BEA is not formed overnight, efforts of many for many years while working on the Environment, Water, Biodiversity and Bioenzymes, the need for a comprehensive public initiative has been felt for the conservation of nature. An initiative that everyone can join. Every family can be a partner. Bioenzyme is such a liquid Its creation and use and promotion can be done by everyone easily. The properties of bioenzyme nurture nature, water resources and bring them to their natural condition. Making use of bioenzyme is a powerful means of giving something back to nature. increased proliferation of bioenzyme, This trend should go to the extent of public initiative and public participation, so there is a need to bring all the entrepreneurs related to the systems like production of bioenzyme, marketing etc. on one platform. There is a need to increase the number of not only entrepreneurs but also such people who can make bioenzyme a medium of employment generation.

Bioenzyme is versatile. There is a need for research on bioenzyme. Its properties take us towards chemical free life. The use of chemicals is becoming a curse in our everyday life. Water and earth are in anguish over the use of our chemicals. There is a great need to save, preserve it for our future generations. BEA is a product of this need. It has been established from the activities of the last one

year that BEA will prove to be a milestone in nature conservation by working in the direction of bioenzyme production, use, mass mobilization and research on it.

Shrekanth - The shaping of any organisation is a very important instrument for growth especially when we have a bigger vision for our Earth. It calls for grassroots work from Logo Design, Tagline, Launch Program that came out as Soul Talk in August 2021, witnessed by global participants.

With the visualisation of bringing global citizens with common mission, initiating the celebration of Dr. Rosukon's birthday (4th January) as World Bio Enzymes Day. This took shape and once again people across the world joined to celebrate World Bio Enzymes Day with BEA.

Setting up of supply chain is the major task to help upcoming Entrepreneurs. Encouraging many youngsters and helping them setting up the brand and marketing strategies is moulding its way to set up new industry. Its not just encouraging the sustainable solution to the society but also enrolling many members to be associated with BEA. Positioning BEA in this complex consumer market is tricky, but focus and hardwork is definitely taking all of us towards sustainable consumerism.

Mentored and supported in setting up India's largest Bio Enzyme manufacturing unit and bring it to be associated with BEA.

Identified potential student members and helped them to receive BEA participation certificates on completion of DIY workshops.

Carried out advanced level courses, such as Business with Bio Enzymes that included BEA membership to all participants who participate in the course. This was done to identify individuals as BEA members and help them to establish their own Bio Enzymes manufacturing unit.

- Collaboration with atleast one University
- Launch of our first Entrepreneur course and be the part of New Education Policy
- Adopting and cleaning water bodies across india
- Supply chain setup to promote budding Entrepreneurs in India
- Research Scholars to initiate research in different field of Bioenzyme
- Collaboration with Govt. bodies to clean water bodies
- International Network

BUGLE

MR. SATISH JAIN, RAIPUR CHATTISGARH

"Talent is given by God but you should respect it by doing good work. Inspiration is one thing and you can't control it, but hard work is what keeps the ship moving. Good luck means, work hard. Keep up the good work".

Maker of 25000L of various BioEnzyme, endless supply of Bioenzyme across India by Mr. Satish Jain, for any kind of water body cleaning, research. Generous donation has enabled this organisation to take up various projects. He has been reaching out to various relevant organisations and leaving no stones unturned to take the message of BEA to all over the country. He has started promoting Bioenzyme Bank Of India (BEBI), wherein we intend to start branches in every district of India.

He has been donating generously to BEA to carry out our regular activities. We sincerely appreciate your efforts Mr. Satish Jain and looking forward towards progressive journey

Holkar (Model, Autonomous) Science College, Indore (M.P.)
Workshop On "Eco-friendly Plant Stress Relievers in Present Scenario"
Date : 28th & 29th March 2022
Organized by :
Department of Biochemistry
In Collaboration with
Noble Alchem Pvt. Ltd., Indore

Director : Angurbala Bafna, Associate Professor & HOD, Dept. of Biochemistry
Patron : Dr. Suresh T. Silawat, Addl. Director, Higher Education, Indore Division, Principal, Govt. Holkar Science College, Indore

Ksheer Sagar purification with bioenzymes starts

The water purification campaign began at the Ksheer Sagar pond in Ujjain on Wednesday.

FP NEWS SERVICE
 Ujjain

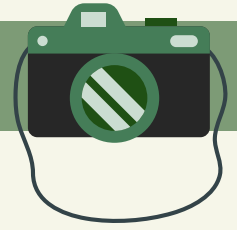

A campaign to purify the water of the ancient Ksheer Sagar pond with the help of bioenzymes has commenced. The campaign is a collective effort of the Bioenzymes Entrepreneur Academy, Bangalore and Bioquestaran, Samajik Evam Janakalyan Sanstha, Ujjain. The employees of the Municipal Corporation Fire Brigade sprayed bioenzymes in the pond on Wednesday.

Corporation Commissioner Anshul Gupta, Executive Engineer Piyush Bhargava and former president Sonu Gehlot were present in this programme. The entire work was done under the guidance of Bioenzymes' Nivesh Vyas and Rohan Gupta and Rajiv Palwa who coordinated on behalf of Bioquestaran said that the effect of spraying that was done on March 17 will be visible within two to three days and after one more dose of the enzymes will be sprayed after a few days. He also assured that the water of the pond will become transparent and all foul smells will disappear within a month. The pond's fish and other aquatic beings will also benefit from this purification. Bioquestaran Samadhan director, Rajiv Palwa along with the Bioenzymes Academy Director, Rohan Gupta, Corporation Commissioner Anshul Gupta, Corporation's former president Sonu Gehlot, Piyush Bhargava and the entire team will be undertaking the campaign.

ORGANISERS

MESSAGES

We are flooded with enormous heartfelt messages in last one year - would like to share few from Nature's Stories Soul Talks

Prabha Singhal - Good morning everyone . Very nice program it's going to increase awareness among people. We are hugely inspired by your initiative. Thanks for organising it .

Aparna - You are doing great work. It feels like the Bioenzyme , Vetiver is becoming a movement and you are the trigger. So carry on and pull me whenever you need

Madhusudhan - Thanks you So much Vani Murthy Madam. Thank you Shrekanth and BEA Team

Vasudha Binjani - thank u so much BEA team for putting this together. what a beautiful Sunday!

Hemamalini - the Awesome Session Dhanyawad

Amos, Africa - Thank you Mrs. Priti, I enjoyed the presentation so far. I will like to learn from the academy online if you permit me. Thank.

Mahesh Navhal. - very beautiful, congratulations! The lesser the praise of all the four sessions. Nature was discussed in depth in all the sessions. The most important thing is that all the four sessions were completed very effectively. The seriousness of BEA and the solutions has gone everywhere . Preeti ji, Shrikant ji, Nagesh ji, Jyoti ji, Roopa ji all of you have done wonders.

Dr. Kajal - All is us who have shifted to bio enzyme are all Earth Warriors. We are doing something constructive in our lives apart from roti kapda and makan Hats off. Salute BEA. You are the future

R Prakash - wonderful concept of Bio Enzymes bank.

Dinesh - excellent Sri kanth, thanks for putting this together

Sanjib Sarangi - what a journey! Inspiring

Renuka Karuppian - wow! no words can express how I feel hats off to you

MESSAGE FROM DR. ROSUKON

Dear Dr. Jaen oon, Pink Pink, Angela, Angel Kwok
Preti, Joko

From Dr. Rosukon Poompanvong,

Thank you for your efforts on Garbage Enzyme (Bio-Enzyme) to produce the Oxygen Layer to Reduce the Heat and less Infections surrounded area where you're work on.

This is an Sample to guide all friends to do Fruit or Herbal Fermented work on Safty Standard and having confident to continue to do more fermentation for Health. In this afforded ever since I was applied to be a Student on Ph.D. of Pharmeo by Fruit Fermented Enzyme on Allergy and Wounded in the 3:1:10; I'll ask our team send you about the Best Presentation in 2547 (2004) at Chiang Mai University.

In The May 2007, I'm very sick from doing to much activities about the work on Reducing The global Heat by Garbage Enzyme and motivate every level of Education In Thailand, to do so.

These are one of the best Guidance to all friends

much love.

Dr. Rosukon Poompanvong
30/4/2022

NOTHING BUT GRATITUDE

We wish to express our sincere gratitude towards the generous contribution from numerous people who stood by us right from the inception of BEA

Dr. Garain worked for two years to get our statutory requirements and the legal document of the trust. His continued guidance in setting systems in place boosts our confidence to move forward. Without the support of our IT Advisor Mr. Narahari Rao, we would have not been able to showcase our website. Who tirelessly worked and launched our Website within two days and integrated all the technical inputs. Mr. Naveen, volunteered in helping us with his creativity in designing our logo, posters for the event, which brought a different perspective to BEA.

BEA is grateful to the generous monetary contribution from Ms. Rupa Kukke from Bangalore and Mr. Satish Jain from Chattisgarh. Their support has helped us walk the path with ease and BEA has completed its first year of journey.

We are grateful to Dr Rosukon & Dr Joean for their continuous guidance, support & blessing right from the inception of the organisation.

BEA would like to thank volunteers, individuals, institutions, organisations for collaborating with us in this journey. We together can do our bit and safeguard our ONLY HOME - EARTH

BEA welcomes generous CONTRIBUTION from individuals, organisation to undertake activities such as water body restoration, seed ball making, training and awareness, tree plantation etc.

How can you contribute?

- Become a member
- Contribute Bioenzyme to members undertaking restoration work
- Volunteer your time for documentation, training, study, research, field visit
- Collaboration & partnership
